

Discrete Optimization

The Journal of Combinatorial Operations Research

Guide for Authors

General

Submission of your manuscript is welcome provided that it, or any translation of it, has not been copyrighted or published and is not being submitted for publication elsewhere. Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information. Manuscripts should be prepared for publication in accordance with the instructions given here (see also <http://authors.elsevier.com>). All contributions should be written in English. Papers submitted to the journal should be written in an elegant and clear style. Prospective authors not expert in English are urged to seek proper assistance in this matter before submitting papers. If the standard of English is such that the work is not understandable, the manuscript will be immediately sent back to the author.

After acceptance, all articles will be formatted to the house style for the journal.

Types of contributions

The journal welcomes the following types of contributions:

- Original research articles.
- Review articles, providing a comprehensive review on a scientific topic.
- Postscript Articles: Short updates to previously published articles in Discrete Optimization. See section below for more details on this kind of article.
- Short Notes and Operation Problems

To whom can I submit my manuscript?

Contributions can also be sent in triplicate to:

Publications Office, RUTCOR, Rutgers, The State University of New Jersey, 640 Bartholomew Road, Piscataway, NJ 08854-8003, USA.

Please note that due to postage time and lack of electronic copy, manuscripts submitted in this manner do not benefit from fast publication times.

Researchers are invited to submit papers to Scott Alessi, Editorial Manager.

Electronic submission is preferable. If not possible, 4 copies of the manuscripts should be sent to the editorial office:

Scott Alessi (Editorial Manager)

RUTCOR, Rutgers University, 640 Bartholomew Road, Piscataway, NJ 08854-8003, USA.

E-mail: editor@rutcor.rutgers.edu

Manuscript preparation

The name, complete postal address, telephone, fax numbers and the e-mail address of the author(s) should be given on the first page of the manuscript.

Each paper should be introduced by three to five keywords and a selfcontained abstract of no more than 100 words, not counting the formulas.

Please make sure that the paper is submitted in its final form. Corrections in the proof stage other than printer's errors should be avoided: costs arising from such corrections will be charged to the authors.

Footnotes should be avoided if possible, but if they are included they should be brief and numbered consecutively.

References should be listed alphabetically, as in the following examples: books [1], articles in journals [2], papers in a contributed volume [3,4], unpublished papers [5].

- [1] E. Borger, Computability, Complexity, Logic, North-Holland, Amsterdam, 1989.
- [2] D.E. Knuth, Theory and Practice, Theoret. Comput. Sci. 90 (1991) 1–15.
- [3] A.K. Lenstra, H.W. Lenstra, Jr., Algorithms in number theory, in: J. vanLeeuwen (ed.), Handbook of Computer Science, Vol. A, Elsevier, Amsterdam, 1990, pp. 673–715.

- [4] M. Li, Lower bounds by Kolmogorov complexity, in: Proc. ICALP '85, Lecture Notes in Computer Science, Vol. 194, Springer, Berlin, 1985, pp. 383–393.
- [5] A. Rajasekar, Semantics for logic programs, Ph.D. Thesis, Department of Computer Science, University of Maryland, 1989.

Figures should be provided in a form suitable for photographic reproduction and reduction. Lettering should be uniform of size corresponding to the anticipated reduction. Handwritten lettering on figures is not acceptable. Figures should be identified by arabic numerals and the captions should be typed, double-spaced, on a separate sheet rather than lettered on the figures themselves. Photographs and coloured pictures must be of impeccable quality. Please note that for printed colour figures the publisher will charge the printing costs to the author. However there is no cost for the colour figures to appear in the online PDF version of the article.

For further instructions on the preparation of electronic figures, see the Author Gateway, at <http://authors.elsevier.com>

A note on TeX and LaTeX submissions

We welcome submissions in the above formats, but due to the production processes involved in the printing of Discrete Applied Mathematics, we cannot make direct use of submitted TeX or LaTeX files in preparing the galley proofs of the articles. We therefore ask that you check the galley proofs carefully.

Keyword instructions

Important Notice: please add three to five keywords to your article.

Keywords play an essential role in current and future information retrieval products on the Internet and will help readers find your article via subject browsing or “More like this” features. To maximize the consistency with which such keywords are assigned by different authors, the following guidelines have been drawn up.

- Each keyword (which can be a phrase of more than one word) should describe one single concept. Words like “and” or “of” should be avoided.
- Avoid very general keywords which become meaningless once in a keyword list, e.g. “action”, “computer”, “mathematics”. Check whether the keywords describe the outline of the article on the whole.
- Use natural language: for instance “automatic error recovery” rather than “error recovery, automatic”.
- Try to use nouns and adjectives as much as possible (i.e. use “automatic error recovery” rather than “recovering errors automatically”). Do not use nouns in the plural form.
- Use English rather than American spelling (regardless of the spelling used for the article itself).
- Avoid the use of abbreviations as much as possible, unless an abbreviation is so well-established that the full term is rarely used (e.g. use “laser” instead of “Light Amplification by Stimulated Emission of Radiation”, but use “computer aided design” instead of “CAD”).

Although these guidelines are not mandatory, they should be adhered to where possible.

Multimedia components

We now offer authors the possibility of enhancing their articles by including multimedia files alongside the online article. These may be pictures, video or audio files. It is also possible to host plain text files of computer code or raw data – or even a spreadsheet or Powerpoint presentation. The files will appear embedded in the article on Science Direct. The only restriction is that we ask that the files are in widely-accepted formats, to ensure the long-term archival needs of electronic publishing are met. If in doubt, please consult with the Author Gateway site, under Artwork Instructions > Multimedia Files

Postscript articles

It is often the case that a published article stimulates debate and new work on a certain subject. Postscript articles are intended as updates to a previously published article to reflect these developments. They are not intended as full-length articles and will have a very rapid publication time. It is also possible to use Multimedia Components in Postscript Articles.

Author benefits

No page charges. Publishing in Discrete Optimization is free.

Free offprints. The corresponding author will receive 25 offprints free of charge. An offprint order form will be supplied by the Publisher for ordering any additional paid offprints.

Discount. Contributors to Elsevier journals are entitled to a 30% discount on all Elsevier books.

Science Direct. The published article will be available via Science Direct.

ScienceDirect Alerting Services

Sign up to our free e-mail alerting services and set up the following alerts:

- *Citation Alert* - A Citation Alert notifies users by e-mail when a selected article is cited by new articles added to ScienceDirect.
- *Journal Issue Alert* - Registered users are e-mailed every time a new issue of a particular journal appears on ScienceDirect.
- *Search Alert* - A Search Alert notifies users by e-mail when a stored search retrieves new results.

Rapid Web Publication

Peer-reviewed papers are online within weeks, ahead of the print version, through the ScienceDirect feature, 'Articles in Press.' On average four weeks after acceptance of an article for publication a preliminary version will be available online which will be replaced by the final version when available.

Author enquiries

For enquiries relating to the submission of articles (including electronic submission where available) please visit Elsevier's Author Gateway at <http://authors.elsevier.com>. The Author Gateway also provides the facility to track accepted articles and set up e-mail alerts to inform you of when an article's status has changed, as well as detailed artwork guidelines, copyright information, frequently asked questions and more.

Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided after registration of an article for publication.
